

MODERN WITNESS 2500 Access Control System

Modern's new Witness 2500 controllers come as a very cost effective 1 door, 2 door and 4 door controller. The system is completely **expandable**: multiple controllers and unlimited readers can be connected using TCP/IP or RS485, or a combination of both. Controllers are managed by extremely user-friendly software that incorporates Access as well as Attendance data and reporting.

- 20,000 user registration, 26 Bit Wiegand format
- 100,000 records/events offline storage
- Expandable to unlimited amount of readers
- High speed flash memory, no loss of data in case of power failure
- Real time events monitor, photo display, door status display
- User defined Reports Format, exportable to Excel
- Detailed daily Attendance Reports
- TCP/IP and RS485 versions
- Expandable I/O and alarm module options
- Faster easier installation results in considerable cost savings
- Hundreds of controllers can be configured in a single system

ACCESS TO PEACE OF MIND™

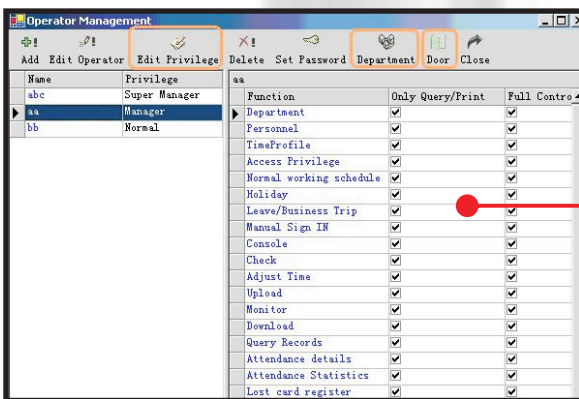

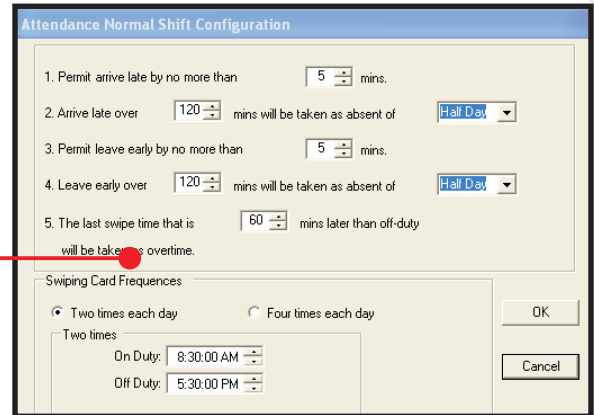

ACCESS CONTROL • PARKING CONTROL • SELF-STORAGE

MW2500

Expanded Functions

- Option for Video Access Control (photo and/or video card reading)
- Electronic Map
- Easily connect Bio-Metric Reader
- Cameras for Door Monitoring
- Anti-Passback
- Quick Search option
- Door Ajar alarm
- Alarm for Intrusion and Invalid Card Swipe

Comprehensive Time and Attendance Reporting for management.

Manual Control and real-time overview of the doors' status, programmable relays and monitored sensors allow you to promptly respond to emergencies and events.

Flexible user information data fields allow for individual access privileges and searches. This translates into flexible, customizable reporting that can easily be exported for data analysis.
